Introduction

EOR in Practice Day

The EOR in Practice Day is a unique opportunity to connect with leading companies in Econometrics and Operations Research. Throughout the event, you'll discover how econometric methods are used to address complex and fascinating real-world business challenges.

The day begins with an inspiring keynote speech, followed by company presentations and one-on-one speed-dating sessions with the organizations of your choice. During lunch, you'll have the chance to network informally with company representatives in a relaxed setting. Later in the afternoon, you'll work together with fellow students on a case study provided by one of the participating companies, putting your analytical skills into practice. The event concludes with an informal networking drink — the perfect way to end the day.

This event offers a great opportunity to expand your professional network, learn more about potential employers, explore MSc programs that inspire you, and discover exciting internship opportunities. This booklet introduces the participating companies and provides an overview of what to expect throughout the day.

Companies:	6	Speaker:	Kinga van Riet
Participation fee:	Free of charge	Location:	Tilburg University

Program

November 27, 2025

Open & Speaker

9:15 - 10:30

You are expected at Blackbox in Esplanade at 9:15. Here, you will receive your name tag and all necessary information. The day will then start with a short introduction by the organizing committee, followed by guest speaker Kinga van Riet who finished a Msc Business Analytics and Operations Research back in 2020. She will share her journey from econometrics to entrepreneurship and how data, innovation, and AI are shaping the future.

Presentations and speeddates

10:30 - 12:30

After the opening, you get the opportunity to learn more about the companies of your preference during presentations and speeddates in the Cobbenhagen building on campus. There will be two rounds of 45 minutes with a short break in between. During each round, two companies will explain their activities, culture, and career opportunities in separate presentations for students. Meanwhile, other companies are having speeddates with the remaining students in a different room to answer any question and to get to know each other.

Lunch at Auberge du Bonheur

12:30 - 14:00

In the afternoon, we have lunch at Auberge du Bonheur. Enjoy delicious food and drinks while being seated with different companies. This is a great opportunity to expand your network.

Company case

14:00- 17:00

In groups of students, you will work on a challenge presented by the organization of your preference. The cases represent real-world problems that give a good impression of what it is like to work for the company.

Networking drink

17:00 - 18:00

At the end of the day, we close the event with an informal drink at Cirifood in the Mensa building. The representatives of the participating companies will be present here as well for you to connect with.

Together, we're building the most exciting real estate consultancy firm in the Netherlands. With innovative solutions, we aim to professionalize the real estate sector and create the conditions in which everyone can excel.

Our ambition is bold. We want to help as many organizations as possible improve both the financial and social returns on their real estate. We make extensive use of big data, as data provides a stronger foundation for every real estate decision. That's why Republiq is made up of equal parts real estate consultants and data scientists. The combination makes all the difference: numbers only come to life when you have a feel for the world behind them.

At Republiq, we believe in mastery. We set high standards for ourselves, our clients, and the industry. And that starts with you. Choose what you're good at and make sure you become the very best at it. Explore all the opportunities within Republiq, but choose your own focus.

We don't have rigid teams or departments for you to work in. You'll be doing what you enjoy most — and we have full confidence that it will be a success.

Cases

Do you want to work with smart, helpful and ambitious colleagues? Do you like to be challenged and to learn a lot? Then Ortec Finance is you belong!

Working at Ortec Finance means working in an organization where long-term (customer) relationships are key. We foster an environment in which colleagues are willing to help each other and customers. We offer you an organizational culture in which you can develop and get the best out of yourself. The culture is informal, easy-going and friendly. But also innovative: how can we jointly make the work of our customers – but also our own work – better, more efficient and easier? Good ideas are always welcome. We give you all the space you need to develop your talents and applaud entrepreneurship.

Ortec Finance is the leading provider of risk and return management technology and solutions. It is our goal to empower our clients to manage the complexity of investment decisions. We do this by delivering industry-leading technologies and investment decision solutions to financial institutions around the world. Municipalities and tax partnerships also belong to our clientele. Our strength lies in an effective combination of advanced models, innovative technology and in-depth market knowledge.

At Ortec Finance, you can gain experience as a student assistant while studying – already starting from just one day per week. You can also complete your thesis with us, or even combine both opportunities!

Ortec Finance is always looking for smart, driven colleagues with great ideas. Most of our employees work as software developers, information analysts, business analysts, quantitative financial analysts, or consultants.

Build Smarter Solutions with The Logic Factory

At The Logic Factory (TLF), we're passionate about turning complex business challenges into smart, data-driven software solutions. As a global consultancy specializing in supply chain planning and optimization, we help organizations around the world improve their performance and unlock value in their operations.

Our teams design, develop, and implement high-quality planning, scheduling, and optimization software that makes a real impact in industries like manufacturing, logistics, and workforce management.

With around 90 talented colleagues spread across our offices in the US, UK, the Netherlands (HQ), and India, we combine local insight with global expertise. What unites us is a shared belief in being real, enjoying what we do, caring deeply about our customers and teammates, and always following through.

If you're driven by problem-solving, technology, and the idea of making businesses run more efficiently, TLF offers an environment where you can grow your skills, collaborate with international experts, and see the results of your work in action.

At EyeOn, we help clients make better/faster decisions in their supply chain using data science. Often by generating the best demand forecast, determining the optimal inventory strategy, or designing the most robust supply network. We do this across multiple industries such as Life Science, Consumer Products, Process, and Discrete Manufacturing.

EyeOn has been supporting large international organisations since its founding in 1999, operating from offices in the Netherlands, Belgium, Switzerland, Ireland, Germany and the US. We offer student jobs, internships and traineeships

Note that Triple A is for Dutch-speaking students only

Triple A - Risk Finance is een onafhankelijk en innovatief consultancybedrijf gespecialiseerd op het gebied van actuariaat en risicomanagement, opgericht in 2006 en gevestigd in Amsterdam. Triple A is een bedrijf met een platte structuur en enthousiaste jonge professionals. Mede door de korte lijnen met het management is er volop ruimte voor eigen inbreng en verantwoordelijkheid. Dit geeft onze medewerkers de kans om buiten de gebaande paden te gaan en de vaak kwantitatief uitdagende opdrachten met een creatieve benadering op te lossen.

We werken vanuit de business lines: Pensions, Insurance, Risk & Strategy Consulting, Banking, Actuarial Technology en Data Analytics. Onze klanten variëren van grote multinationals tot kleine ondernemingen onder te verdelen in banken, verzekeraars, pensioenfondsen, pensioenuitvoerders en werkgevers. We werken vanuit ons eigen kantoor, thuis en op locatie bij de klant.

Voorbeelden van werkzaamheden zijn onder andere:

- Ontwikkeling van actuariële projectiemodellen
- Uitvoering van risicoanalyses
- Prijsstelling van schade- en inkomensverzekeringen
- Advisering over nieuwe pensioenregelingen
- Asset & liability management
- Ontwikkeling van krediet- en marktrisico modellen

Een standaard carrièrepad bestaat dan ook niet binnen Triple A. Je ontwikkelt je als risk professional met je eigen accenten. Kortom, we bieden uitgebreide mogelijkheden tot een zeer uitdagende carrière in de consultancy op het gebied van actuariaat en risicomanagement.

Cases

We are ORTEC, a purpose-driven organization changing businesses and society at large through the power of data-driven mathematical optimization. We make businesses more efficient, more predictable and more effective. Turning complex challenges into easy-to-use solutions.

ORTEC's products and services result in optimized fleet routing and dispatch, vehicle and pallet loading, workforce scheduling, delivery forecasting, logistics network planning and warehouse control. ORTEC offers stand-alone, custom-made and SAP® certified and embedded solutions, supported by strategic partnerships.

We serve clients in almost every industry. And with 17 offices strategically located across 4 continents, we can deliver solutions on a global scale. Always underpinned by local know-how and service.

ORTEC is an ambitious organization. Since our founding in 1981, we have grown to employ over 1000 people at locations in Europe, the United States, Australia and Brazil. Most of our employees began working with us after completing their studies. The average ORTEC employee has a technical master's or bachelor's degree, a strongly developed capacity for analytical thinking and the drive to understand problems and then to solve them. The company's organizational structure is flat, with short lines of communication. The atmosphere is open and informal, which forms an excellent basis for a productive working environment.

We are always looking for ambitious students/starters who have affinity with IT, optimization and logistics. As a student you can do a graduation internship and as an graduate you can do an traineeship.
